Bellinda

medium early premium quality salad potato

Maturity	medium early	Tuber tuber shape eye depth flesh colour skin raw discolouration	long oval shallow deep yellow yellow, smooth low
Cooking type (EAPR)	A		
Consumption quality	high quality salad potato, excellent flavour, deep yellow flesh colour, no discolouration after cooking		
Yield	high marketable yield, medium sized tubers, uniform grading	Resistances PCN leaf blight tuber blight common scab	Ro 1, Ro 4 high - medium high medium - low
Youth development	quick	Sensitivities spraing bruising mechanical damage	medium - low medium - low medium - low
Dormancy	high, very good storability		

Bellinda has medium to high demands to the soil and water supply, soils with uniform water supply should be preferred.

Bellinda is growing uniform medium sized tubers. Due to the medium to high tuberisation rate the recommended plant density is approx. 43,000 plants/ha.

Bellinda is slightly sensitive to Metribuzin (Sencor, etc.), especially post emergence application should avoided.

Bellinda is combining high yield, very nice skin finish and excellent flavour, therefore this variety is excellent suitable for washing, pre-packing and marketing in premium quality programmes.

All particulars are based on official variety trials and/or our own experience.
However, as potatoes are natural products we cannot undertake any liability for these details.
