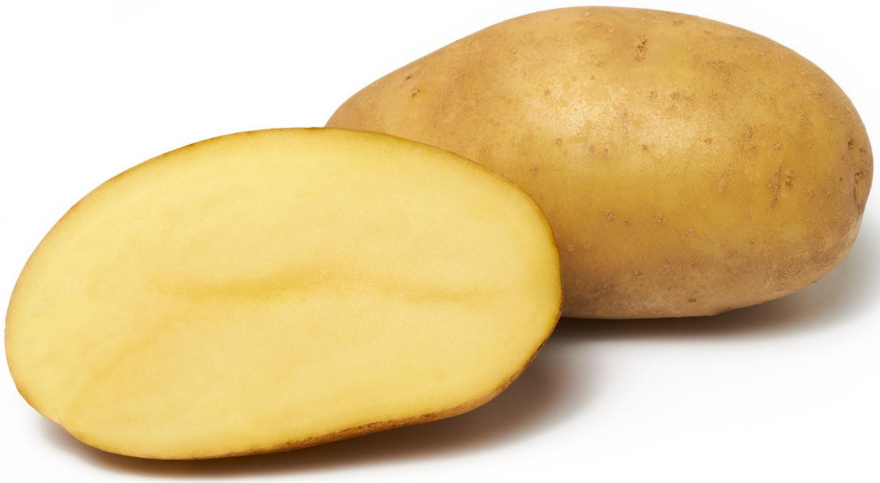
EUROPLANT

THEDA



medium late processing variety for French Fries

- yellow flesh colour
- longoval tuber shape
- reliable starch content
- high product quality from long-term storage

THEDA

THEDA - high adaptability and product quality from long-term storage

Growing recommendations				
Site requirements	no special requirements in terms of location			
Planting	**Seed material sorting 35/55**	**Row width**		**Tubers/ha**
		75 cm	**90 cm**	
		34-36 cm	28-30 cm	38,000
	Planting depth	standard		
	Seed preparation	has a good dormancy; sprout stimulation evenly before planting (7-10 days)		
	Seed dressing	dressing against Rhizoctonia solani recommended		
Herbicides	no sensitivities are known when used properly*			
Foliage	average leaf health; timely and regular use of fungicides against late blight is required			
Harvest	ensure gentle harvest			
Fertilization incl. return of previous crop at medium supply level				
Nitrogen (N)	medium - compared to the local standard (2/3 before planting and 1/3 later)			
Phosphorus (P_2O_5)	100 kg/ha (water soluble phosphate at planting)			
Potassium (K_2O)	400-350 kg/ha (up to 150 kg/ha chloride possible; on lighter soils split doses)			
Magnesium (MgO)	70 kg/ha (for yield and quality assurance)			
Variety characteristics				
Maturity	medium late	**Tuber characteristics**		
Processing quality	high product quality	Tuber shape	longoval	
Yield	high yields with medium tuber numbers	Eye depth	very shallow - shallow	
		Flesh colour	yellow	
		Skin colour	yellow	
		Skin	smooth	
		Number of tubers	medium	
Youth development	initially hesistant, later rapid	**Resistances**		
		PCN	Ro1 (9)	
		Potato wart disease	1	
Dormancy	good dormancy	**Sensitivities**		
		Common scab	low	
		Spraing	low	
		Bruising	medium	
		Mechanical damage	high	

* preliminary

All particulars are based on official variety trials and/or our own experience. However, as potatoes are natural products we cannot undertake any liability for these details. (06/2024)
