

EUROPLANT

JULIANE

early to mid-early, mainly firm cooking table potato

- ✓ yellow flesh colour
- ✓ visually appealing tubers
- ✓ high marketable yields
- ✓ broad nematode resistance

JULIANE - quality ware potato with broad nematode resistance

Growing recommendations				
Site requirements	prefers average locations with uniform supply of water and nutrients			
Planting 	Seed material sorting 35/50	Row width		Tubers/ha
		75 cm	90 cm	
		30-32 cm	25-27 cm	43,000
	Planting depth	standard		
	Seed preparation	no special preparation necessary		
	Seed dressing	dressing against Rhizoctonia solani recommended		
Herbicides	no sensitivities are known when used properly			
Foliage	average leaf health; timely and regular use of fungicides against late blight is required			
Harvest	ensure gentle harvest			
Fertilization incl. return of previous crop at medium supply level				
Nitrogen (N)	medium - compared to the local standard (whole amount at planting)			
Phosphorus (P ₂ O ₅)	100 kg/ha (water soluble phosphate at planting)			
Potassium (K ₂ O)	350-270 kg/ha (up to 80 kg/ha chloride possible; on lighter soils split doses)			
Magnesium (MgO)	70 kg/ha (for yield and quality assurance)			
Variety characteristics				
Maturity	early to medium early	Tuber characteristics Tuber shape Eye depth Flesh colour Skin colour Skin Number of tubers	roundoval shallow yellow yellow smooth medium - high	
Cooking type	B			
Consumption quality	mainly firm cooking, high consumption quality with low discolouration after cooking	Resistances PCN Nematode tolerance	Ro1 (9), Ro2/3 (9), Ro5 (9) Pa2 (9), Pa3 (8) tolerant	
Yield	high marketable yields with fine grading	Sensitivities Common scab Spraing Bruising Mechanical damage	very low - low low very low - low low - medium	
Youth development	rapid			
Dormancy	very dormant, good storability			

All particulars are based on official variety trials and/or our own experience. However, as potatoes are natural products we cannot undertake any liability for these details. (05/2026)
