

EUROPLANT

KERREN

medium early processing variety for French Fries

- ✓ white flesh colour
- ✓ longoval tuber shape
- ✓ high marketable yields
- ✓ high baking quality after cold storage

KERREN - high processing quality, even from long-term storage

Growing recommendations				
Site requirements	prefers average locations with uniform supply of water and nutrients			
Planting 	Seed material sorting 35/55	Row width		Tubers/ha
		75 cm	90 cm	
		34-36 cm	28-30 cm	38,000
	Planting depth	standard		
	Seed preparation	has a good dormancy; sprout stimulation evenly before planting (7-10 days)		
Seed dressing	dressing against Rhizoctonia solani recommended			
Herbicides	no sensitivities are known when used properly*			
Foliage	average leaf health; timely and regular use of fungicides against late blight is required			
Harvest	French Fries form - therefore slightly prone to damage; raise gently			
Fertilization incl. return of previous crop at medium supply level				
Nitrogen (N)	medium - compared to the local standard (2/3 before planting and 1/3 later)			
Phosphorus (P ₂ O ₅)	100 kg/ha (water soluble phosphate at planting)			
Potassium (K ₂ O)	400-350 kg/ha (up to 150 kg/ha chloride possible; on lighter soils split doses)			
Magnesium (MgO)	70 kg/ha (for yield and quality assurance)			
Variety characteristics				
Maturity	medium early	Tuber characteristics Tuber shape Eye depth Flesh colour Skin colour Skin Number of tubers	longoval shallow - medium white yellow rough low - medium	
Processing quality	consistent baking qualities; suitable for light soils			
Yield	high yield performance for French fries	Resistances PCN	Ro1 (9)	
Youth development	initially hesitant, later rapid	Sensitivities Common scab Spraing Bruising Mechanical damage	low very low - low medium high	
Dormancy	good dormancy
