

EUROPLANT

MILVA

medium early, mainly firm cooking quality ware potato

- ✓ yellow flesh colour
- ✓ very high marketable yield
- ✓ high yield packing variety
- ✓ good storability

MILVA - high yield and quality for packing and peeling

Growing recommendations				
Site requirements	average to better soil conditions; locations susceptible to rust spot should be avoided			
Planting 	Seed material sorting 35/55	Row width		Tubers/ha
		75 cm	90 cm	
		30-32 cm	25-27 cm	43,000
	Planting depth	standard		
	Seed preparation	has a good dormancy; sprout stimulation evenly before planting (7-10 days)		
	Seed dressing	dressing against Rhizoctonia solani recommended		
Herbicides	no sensitivities are known when used properly			
Foliage	good, average leaf health			
Harvest	standard			
Fertilization incl. return of previous crop at medium supply level				
Nitrogen (N)	low - compared to the local standard (2/3 before planting and 1/3 later)			
Phosphorus (P₂O₅)	100 kg/ha (water soluble phosphate at planting)			
Potassium (K₂O)	350-270 kg/ha (as chloride)			
Magnesium (MgO)	70 kg/ha (for yield and quality assurance)			
Variety characteristics				
Maturity	medium early	Tuber characteristics Tuber shape Eye depth Flesh colour Skin colour Skin Number of tubers	oval shallow yellow yellow netted high	
Cooking type	B - A			
Consumption quality	no discolouration after cooking			
Yield	very high tuber yield; uniform grading; high marketable yield	Resistances PCN	Ro1, Ro4	
Youth development	rapid	Sensitivities Common scab Spraing Bruising Mechanical damage	very low - low medium very low - low low	
Dormancy	very dormant, suitable for long-term storage			

All particulars are based on official variety trials and/or our own experience. However, as potatoes are natural products we cannot undertake any liability for these details. (07/2023)
