

varieties, competence & service

Andrea

premium quality salad potato

- very early to early maturity
- yellow flesh colour
- excellent culinary quality
- very attractive tuber shape
- very uniform grading

Andrea is an exquisite salad potato with very nice tuber appearance and outstanding culinary quality.

Variety characteristics			
Maturity	medium early	Tuber	Tuber shape Eye depth Skin Flesh colour Raw discolouration
Cooking Type (EAPR)	A		
Consumption quality	premium quality salad potato; excellent flavour; low discolouration after cooking		
Yield	high marketable yield	Resistances	Potato wart disease PCN Common scab
Youth development	initially hesitant, later rapid		
Dormancy	high, good storability	Sensitivities	Spraing Bruising Mechanical damage
			long-oval shallow yellow, very smooth yellow low
			1* Ro 1(9), Ro 4** high
			low low - very low medium - low
Growing recommendations			
Site requirements	preferably grown on medium to good soils with uniform water and nutrient supply. On light soils special care should be taken on proper water supply		
Planting	planting density	approx. 38,000 plants/ha (seed size 35/55 mm) for early harvest. Up to approx. 41,000 plants/ha in case of later intended harvest	
	planting depth	normal	
	seed preparation	due to high dormancy of a temperature shock short before planting or disposing to pre-sprouting extremely important!	
	seed dressing	preventive control of <i>Rhizoctonia solani</i> is generally recommended	
Fertilization			
Nitrogen	local standard (approx. 160 kg/ha, incl. soil supplied N _{min})		
Phosphorus	100 kg/ha (at planting, water soluble phosphate)		
Potassium	200 - 250 kg/ha (at medium soil supply class)		
Magnesium	60 kg/ha		

*) resistance attested in one EU-member state
 **) preliminary result, resistance expected

All particulars are based on official variety trials and/or our own experience. However, as potatoes are natural products we cannot undertake any liability for these details.
