

Variety characteristics			
Maturity	medium late	Tuber	
Yield	high and stable starch content with good yields	Tuber shape Eye depth Skin	round oval medium yellow
Quality Starch content	high	Resistances	
Youth development	rapid	Potato wart disease PCN Virus	D1 Ro 1 + 4 good
Dormancy	good storability	Sensitivities	
		Scab Spraing Bruising Mechanical damage	medium medium medium - high medium - high
Growing recommendations			
Site requirements	medium demands to the soil and water supply; soils with uniform water supply should be preferred		
Planting	planting density	approx. 43.000 plants/ha (seed size 35/55 mm)	
	planting depth	normal	
	seed preparation	sprouting stimulation is generally advantageous	
	seed dressing	preventive chemical control of <i>Rhizoctonia solani</i> is generally recommended	
Foliage	Euroresa has a good and strong foliage - protective control of late blight within the usual spraying programme is recommended		
Herbicides	no sensitivities known		
Fertilization			
Nitrogen	low-medium - compared with local standard		
Phosphorus	100 kg/ha (at planting, water soluble phosphate)		
Potassium	150 kg/ha		
Magnesium	60 kg/ha		

All particulars are based on official variety trials and/or our own experience. However, as potatoes are natural products we cannot undertake any liability for these details.
