

varieties, competence & service

Georgina

high yielding, medium early quality ware potato

- stable high yield with nice tuber shape
- uniform grading, big tuber size
- very nice smooth skin
- shallow eyes

Variety characteristics			
Maturity	medium early	Tuber Tuber shape Eye depth Skin Flesh colour	short-oval - oval shallow yellow, smooth yellow - light yellow
Cooking Type (EAPR)	B		
Consumption quality	quality ware potato; good table quality		
Yield	high marketable yield; very uniform big tubers	Resistances PCN Virus diseases Leaf blight Common scab	Ro 1(9), Ro 2/3(8) medium medium high
Youth development	rapid		
Dormancy	high; good storability	Sensitivities Spraing Bruising Mechanical damage	low very low low - medium
Growing recommendations			
Site requirements	medium demands to soil quality and water supply. Soils with high pressure of common scab and second growth should be avoided		
Planting	planting density	approx. 39.000 plants/ha (seed size 35/55 mm) => check QR Code for more details	
	planting depth	normal compared with local standard	
	seed preparation	sprouting stimulation generally advantageous	
	seed treatment	preventive control of <i>Rhizoctonia solani</i> is generally recommended	
Foliage	Georgina has a good and very strong foliage - protective control of late blight within the usual spraying program is recommended		
Herbicides	no sensitivities known		
Fertilization			further information
Nitrogen	low-medium - compared with local standard		
Phosphorus	100 kg/ha		
Potassium	200 - 250 kg/ha (medium soil supply class)		
Magnesium	60 kg/ha		

All particulars are based on official variety trials and/or our own experience.
However, as potatoes are natural products we cannot undertake any liability for these details.
