Thalessa

medium early processing variety for crisps
and purée

- good dormancy
- excellent stability in colour
- processing in high quality

Thalessa

Medium early processing variety
for crisps and purée

Variety characteristics			
Maturity	medium early	Tuber Tuber shape Eye depth Skin Flesh colour	round shallow - medium rough light yellow - yellow
Cooking Type (EAPR)			
Processing quality	very good stability in colour		
Yield	medium, good dry matter	Resistances PCN Potato Virus Y (PVY) Leaf blight Tuber blight Black leg Rhizoctonia Common scab	Ro 1(9), 4(9) high - very high medium medium - high high high medium - high
Youth development	very quickly		
Dormancy	good for cold storage crisps > 6 °C purée > 4 °C	Sensitivities Spraing Bruising Mechanical damage	low low low - medium
Growing recommendations			
Site requirements	preferably grown on medium soils with uniform water and nutrient supply		
Planting	planting density	approx. 43,000 plants/ha (seed size 35/55 mm) => check QR Code for more details	
	planting depth	normal	
	seed preparation	warming up of seed tubers 3 days before planting	
	seed dressing	preventive control of <i>Rhizoctonia</i> is generally recommended
