

varieties, competence & service

# Albertine

very early mainly firm cooking variety

- mainly firm cooking
- very early skinset
- attractive tubers with smooth skin
- early high yielding

# Albertine

very early, mainly firm cooking,  
good quality ware potato

early yield and skinset = **Albertine**

Variety characteristics			
<b>Maturity</b>	very early	<b>Tuber</b> Tuber shape Eye depth Skin Flesh colour	oval shallow smooth yellow
<b>Cooking Type (EAPR)</b>	B		
<b>Consumption quality</b>	yellow flesh colour		
<b>Yield</b>	medium marketable yield with attractive sized tubers	<b>Resistances</b> PCN Potato Virus Y (PVY) Leaf blight Tuber blight Rhizoctonia	Ro 1(9) medium medium medium - high high
<b>Youth development</b>	rapid	<b>Sensitivities</b> Spraing Bruising Mechanical damage Common scab	low - medium low low - medium low - medium
<b>Dormancy</b>	good, during the first months		
Growing recommendations			
<b>Site requirements</b>	preferably grown on good soils with uniform water supply		
<b>Planting</b>	planting density	approx. 41.000 plants/ha (seed size 35/55 mm), for later harvest 2 cm deeper	
	planting depth	normal	
	seed preparation	sprouting stimulation before planting	
	seed dressing	preventive control of Rhizoctonia is generally recommended	
<b>Foliage</b>	<b>Albertine</b> has a normal foliage - protective control of late blight within the usual spraying program is recommended		
<b>Herbicides</b>	slightly sensitive to Metribuzin for pre- an post emergence		
Fertilization			further information
<b>Nitrogen</b>	medium - compared to local standard		
<b>Phosphorus</b>	100 kg/ha (at planting, water soluble phosphate)		
<b>Potassium</b>	200 - 250 kg/ha (at medium soil supply class)		
<b>Magnesium</b>	60 kg/ha		

All particulars are based on official variety trials and/or our own experience.  
However, as potatoes are natural products we cannot undertake any liability for these details.
